IPA Research on Kenya's Rural Electrification Featured in PBS NewsHour

PBS NewsHour covers Kenya's Last Mile Connectivity Project, which aims to connect 70% of the country to electricity, with a focus on rural communities. However, IPA's research in Kenya has shown that contrary to many people's beliefs, a large proportion of Kenyans already live underneath electrical lines, they just lack the connection to them. IPA alumna Susanna Berkouwer spoke about her current research team's work surveying the impact of electricity on people's lives.
