Socioeconomic Characteristics of Rohingya Refugees from Myanmar Living in Bangladesh

APRIL 2020

Background

one ungar until to

Cox's Bazar district in Banglades hinas inceised in utiliple
manes of Rohingoa entigness from Myanmar since the
1970s, but like 2017 saw the largest and fishelst refugee
influx in Bangladeshin instory. Between August 2017
and Decomber 2018, 1745,000 Riningoa entigness field
Myanmar into Cox's Bazar, Bangladeshi, fullowing an
outlineask of vivilence in Rakhine State. ¹As of Decomber
31, 2019, Teismal and Usikia sub-districts host an
extimated 854,704 stansiess Rohingoa mitigaes, almost
adid valor in like in densely populated camps (UNIKCR)
2019.

Researchers from Yale University*, the World Bank, and the Garder and Adolescence: (So ball Evidence (GAGE) instantes started the Cost Bazar Panel Survey (CBPS) instantes started the Cost Bazar Panel Survey (CBPS) instantes started the Cost Bazar Panel Survey (CBPS) instantes and government stakeholities involved in the ess go me to the influe of entgees. This curvey is an inched ph household survey covering 5,000 to useholds' living in both entgee Camps and host one murities. This quantitative interviews with adolescents and their coverbees.

The aim is to better understand the ways in which the challenges faced by flohings and gees while they were long in Myamma are likely to affect their ability—and the ability of future generations of flohingsa—to attain a better long standard in their host communities, with a view to informing policy and programming.

Daving from a surveyon entrispective employment and labor income from the first sound of paneldata in 2019, we compare these prougs: the population of Myannar, Rohingay are ple who crossed the border into Bangladesh in 2017, and those who left Myannar great to 2017 and are currently living in Quick Bazar.

Key Facts

- STRIL pre-dis placement labor force participation rates were high among refuger men and comparable to those of men acros Myanmac, as reported in the 2017 Myanmar Labor Roice Survey.

- Despite the cledible reports that assets were commonly confiscated or destroyed in Myarmac Ro Inigrap or figures displaced from Myarmar after July 2017 owned more assets than Ro Inigga who left Myarmar prior to 2017.
- Rohingya refugees in camps had on average an age dependency* radio of 12d compared to 0.89 in host com munity households, reflecting the geaster pressure on vending age refugees to find jo bs and provide for the basic recessities for their household.

Socioeconomic Characteristics of Rohingya Refugees from Myanmar Living

in Bangladesh

Cox's Bazar district in Bangladesh has received multiple waves of Rohingya refugees from Myanmar since the 1970s, but late 2017 saw the largest and fastest refugee influx in Bangladesh's history. Between August 2017 and December 2018, 745,000 Rohingya refugees fled Myanmar into Cox's Bazar, Bangladesh, following an outbreak of violence in Rakhine State. As of December 31, 2019, Teknaf and Ukhia sub-districts host an estimated 854,704 stateless Rohingya refugees, almost all of whom live in densely populated camps (UNHCR 2019).

Researchers from Yale University, the World Bank, and the Gender and Adolescence: Global Evidence (GAGE) initiative started the Cox's Bazar Panel Survey (CBPS) in order to provide accurate data to humanitarian and government stakeholders involved in the response to the influx of refugees. The survey is an in-depth household survey covering 5,020 households living in both refugee camps and host communities. This quantitative data collection is complemented with qualitative interviews with adolescents and their caregivers.

In line with the 2018 Global Compact for Refugees commitment to promote economic opportunities, decent work, and skills training for both host community members and refugees, this brief presents a set of stylized facts on the socioeconomic status of Rohingya refugees in 2019 and in the year preceding the latest outbreak of violence.

The aim is to better understand the ways in which the challenges faced by Rohingya refugees while they were living in Myanmar are likely to affect their ability—and the ability of future generations of Rohingya—to attain a better living standard in their host communities, with a view to informing policy and programming.

Drawing from a survey on retrospective employment and labor income from the first round of panel data in 2019, we compare three groups: the population of Myanmar, Rohingya people who crossed the border into Bangladesh in 2017, and those who left Myanmar prior to 2017 and are currently living in Cox's Bazar.
