Innovations for Poverty Action (IPA) is a global research and policy nonprofit that discovers and advances what works to improve the lives of people living in poverty. IPA tests promising ideas across contexts and along the path to scale, proactively engages key decision-makers throughout the research process, shares findings with the right people at the right time, and equips partners with the skills and tools they need to use data and evidence. Since our founding in 2002, we have worked with over 600 leading academics to conduct more than 300 evaluations in 52 countries. This research has informed hundreds of successful programs that now impact hundreds of millions of lives worldwide.

More Evidence

Founded in 2019, IPA Nigeria develops applicable research by building foundational research capacity and conducting evaluations in areas of pressing national concern. Examples of our work below offer promising insights into critical issues that affect the livelihoods of people experiencing poverty.

PEACE & RECOVERY

Contact between farmers and herders (mostly through inter-drawings) has the potential to reduce the incidence of violent conflicts.

RESEARCHERS: GENDRE, A. DURE, BOEREN, J. HENRI, JAMES ROBINSON

Researchers partnered with the NIGQ Search for Common Ground (SFCG) and IPA Nigeria to implement a randomized evaluation of an intervention that encourages contact between farmers and herders in the Middle Belt of Nigeria. The goal will be to discern both whether, and how, this contact can reduce the incidence of violent conflicts. Further, given the prevalence of lingering challenges inherent to a wide range of

conflicts, the findings could be broadly generalizable to instability and conflict outside of the Nigerian context.

ENTREPRENEURSHIP & PRIVATE SECTOR DEVELOPMENT

Evidence suggests socio-emotional skills can improve business outcomes and help close the gender gap in earnings between male and female small agribusiness owners.

RESEARCHERS: AYODELE BALOGUN, CLARA DELAVALLADE, SHELAKSHI PARIKH

The World Bank Africa Gender Innovation Lab (GIL) and IPA Nigeria partnered with the Nigeria Federal Ministry of Agriculture and Rural Development to evaluate the impact of the Women and Youth Empowerment program (WYEP) within the Agro-Processing, Productivity Enhancement, and Livelihood Improvement Support (APREALS) project. The evaluation will shed light on the impact of socio-emotional skills training

IPA NIGERIA

Since 2019

FOCUS SECTORS
Agriculture, Consumer Products, Education, Entrepreneurship & Private Sector Development, Financial Inclusion, Health, Human Trafficking, Peace & Recovery, Social Protection

RESEARCH STUDIES

Planning, Implementation

KEY PARTNERS

Bank of Industry, IFAD International Council Bank of Nigeria (CBN), Federal Competition and Consumer Protection Commission (FCCPC), Federal Ministry of Agriculture and Food Security, Federal Ministry of Health, Federal Ministry of Education, Global Development Network (GDN), National Agency for the Regulation of Trafficking in Persons (NATIP), Save the Children, Thinkwell, World Bank

KEY RESEARCHERS

AFFILIATIONS
Arizona State University, Pennsylvania State University, Business School, BSE, Indian Institute of Economic Research, University of Chicago, University of Michigan, University of Michigan, World Bank, WFP/Media Social Science Center
