Nature Medicine Commentary on COVID-19 Vaccine Acceptance and Hesitancy in Low- and Middle-Income Countries

Nature Medicine features commentary by Shingai Machingaidze and Charles Shey Wiysonge on the new study "[COVID-19 vaccine acceptance and hesitancy in low- and middle-income countries](#)." They argue that the findings of the study "suggest that prioritizing distribution of vaccines to LMICs is justified not only on equity grounds but also on the expectation of higher marginal returns in maximizing global coverage at a faster rate."

This study was also featured in a range of other outlets, including [SciTech Daily](#), [IFL Science](#), [Yale Insights](#), [Cornell University](#), [University of Minnesota](#), [Trinity College Dublin](#), [The London School of Economics and Political Science](#), [Hindustan Times](#), [Business Standard](#), [Galileu](#) (in Portuguese) [Helsinki Times](#), [Naked Science](#) (in Russian), and [The Tyee](#).
