Better Governance Strategies across Asia's Digital Divide: A 100 Governance Questions Initiative

For the last few months, The GovLab, the Asia Foundation, BRAC Institute of Governance & Development Bangladesh, and The Centre for Strategic and International Studies Indonesia have sought to source the questions that data could answer toward transforming the way different societies govern themselves. On October 25, IPA presented at "Better Governance Strategies across Asia's Digital Divide: A 100 Governance Questions Initiative," an event hosted by The Asia Foundation to reflect on the questions identified and how to operationalize them leveraging new and traditional datasets. [Nassreena Baddiri](#), IPA Philippines Country Director, presented as one of four panelists. To learn more, see the Eventbrite page [here](#).
