NATIONAL BUREAU OF ECONOMICS RESEARCH 1050 Massachusetts Avenue Cambridge, MA 01238 September 2019

For implementation we thank the Alliance for Election Campaign Finance Monitoring (ACFIM) and the National Democratic Institute (NDI) in Uganda; we are particularly indebted to Teresa Lexano Cadwallader, Henry Muguzi, Simon Osborn, and Ivan Tibernanya. We are grateful to Kelsey Barren, Alex Nawar, and Harrison Pollock for their outstanding resoarch management and assistance in Uganda, to the entire executive staff at IPA Uganda for ensuring the completion of the survey work, and we thank Peter Deffether hand Patriyk Perkowski for excellent research assistance in the United States. We also thank Pia Raffler and Melina Platas Leana for sharing data and providing advice on field operations. We benefited from helpful comments and suggestions from Daron Acemglia, Aislinn Bohene, Erika Deserranso, Michael Kerner, Marco Gonzalez-Navarro, Edmand Malesky, Ben Olken, Berk Ozder, Nancy Qian, Jorg Spenkuch, David Stromberg, Rebecca Weize-Shapino, and the EGAP peer response system (in particular, Katherine Casey, Nahomi Ichino and Macartan Humphreys), and participants at APSA 2016, CAF Development Bank of Lain America, Harvard University, the Institute for International Economic Studies (IEES) at Stockholm University, MIT, Northwestern University, Represon University, UCL, the University of Houston, the University of Toronto, Uppsala University, Warwick University, and WPSA 2017. We gratefully acknowledge financial support from the JPAL Governance Initiative and the International Growth Centre. The views expressed herein are those of the authors and do not necessarily reflect the views of the National Bureau of Economic Research.

At least one co-author has disclosed a financial relationship of potential relevance for this research. Further information is available online at http://www.nber.org/papers/w26293.ack

NBER working papers are circulated for discussion and comment purposes. They have not been peer-reviewed or been subject to the review by the NBER Board of Directors that accompanies official NBER publications.

Eat Widely, Vote Wisely? Lessons From A Campaign Against Vote Buying In Uganda

We estimate the effects of one of the largest anti-vote-buying campaigns ever studied — with half a million voters exposed across 1427 villages—in Uganda's 2016 elections. Working with civil society organizations, we designed the study to estimate how voters and candidates responded to their campaign in treatment and spillover villages, and how impacts varied with

campaign intensity. Despite its heavy footprint, the campaign did not reduce politician offers of gifts in exchange for votes. However, it had sizable effects on people's votes. Votes swung from wellfunded incumbents (who buy most votes) towards their poorly-financed challengers. We argue the swing arose from changes in village social norms plus the tactical response of candidates. While the campaign struggled to instill norms of refusing gifts, it leveled the electoral playing field by convincing some voters to abandon norms of reciprocity—thus accepting gifts from politicians but voting for their preferred candidate.
