Women have borne the bount of the socioeconomic impact of the COVID-19 pandemic." Online), mogity 19 percent of non-service engined before the pandemic congress to expect of some service engined before the pandemic compared to expect of some new or the pandemic but designed by the pandemic soft the extreme the designed of this deside. Socioecon of the extreme varieties and extreme control of the extreme control on a common designed on a common designed on the social social engine the extreme control on the social engine the extreme control on th

COVID-19 has also had a dismatic impact on unpaid work such as child and either care, cooking, directing, and other domestic responsibilities. Prior to the pandemic, women parts mad a dispulsor through a mount of unpaid domestic and care work; globally, winners were spending inplyly these times an inany focus as me non-such activities. Yill build not not become one of the work of the control building not believed using across the world. Women in the and middle-encore occurries spending more time unpaid domestic and care wish than their counting parts in higher-encore countries. The time and building for the control of the countries spending and the countries of the countries of and the countries of the countri with rinal works," Bethin the pandlemic, women-were also more likely than men to like the pix for reducin frour due to Care work obligation in. "Many key coming ments of global COMD-19 resignate and militagetten measures—much also suit-of-faction joe roots, stoy-at-home orders, and presents on an engo mare to regime of health miss for the presents on an engo mare to required health miss for the presents on the proposed of the presents of the proposed of the presents of the

As low- and middle-income countries confinue to respond to and recover from the COVID-10 risk, decision-makers will need to confected with we ment, pill boxes, declines in sibert force participation, and challenges related to unpaid work, in this bred, innovations for flowerly Action to unpaid work, in this bred, innovations for flowerly Action that compiled work in a decision of the production of the sibert of the sib

Supporting Women's Participation in the Labor Force in the COVID-19 Crisis and Beyond

In this brief, Innovations for Poverty Action has compiled evidence-based insights from randomized evaluations and quasi-experimental studies from non-crisis periods on how to support women's return to the labor force and/or increase their participation in the workforce in low- and middle-income countries. We particularly focus on insights that may be applicable in the recovery from the COVID-19 pandemic.
