

2015 IPA Annual Report

IPA is synonymous with impact. We're known for both measuring impact and using those results to impact people's lives. In 2015, we further improved our research quality and grew in research quantity, and we began new efforts to share results to improve programs and policies for the poor. Since our founding in 2002, IPA has worked with over 400 leading academics to conduct over 600 evaluations in 51 countries. This research has informed hundreds of successful programs that now impact millions of individuals worldwide.
