FORUM ON INVESTING IN YOUNG CHILDREN GLOBALLY (iYCG)
WORKSHOP #9
INNOVATIONS IN INVESTING IN YOUNG CHILDREN GLOBALLY

Held in partnership with the Jacobs Foundation, the Institute for Human Development
at the Aga Khan University, and the Bernard van Leer Foundation

Hotel Tinn
Boulevard de la République
Abidjan, Côte d'Ivoire

October 20-21, 2016

In this ninth and final workshop of the Forum, speakers will explore research on the costs of quality investments in young children; policies and financing that capitalize on existing investments and other contextual advantages; and practices and research that are culturally grounded and developmentally. This workshop will also provide an opportunity to highlight the work of innovators from academia, non-governmental organizations, governments, and business conducting cutting edge work in these areas. While not traditionally considered "innovative", long term approaches to investing in young children in West Africa will also be presented. Furthermore, given the unique circumstance of Francophone countries in Africa, the workshop will highlight some of the challenges and barriers to investments in young children in these countries as well as identify examples of research, policies, and practices that overcome these barriers to support young children.

Specific topics to be addressed:

1. Explore the costs and financing of quality early childhood development programs and policies with a focus on innovative financing tools, models or ideas. Include views from outside the traditional child health and development fields that may be complementary to strengthening investments in young children's health, education, nutrition, and social protection.
2. Highlight innovations from research, program development and evaluation, and technology and product development that seek to improve children's health, education, nutrition, and social protection. Innovations can be longstanding successes or ideas that have not yet been launched or scaled.
3. Discuss the challenges and historical and sociopolitical barriers to investing in Francophone countries, and explore opportunities to build off existing promising investments and innovations.

IPA Côte d'Ivoire Presents on Investing in Young Children

On October 21, Henriette Hanicotte presented IPA's work at the [Forum on Investing in Young Children Globally](/sites/default/files/Innovations%20in%20Investing%20in%20Young%20Children%20Globally_agenda.pdf) (iYCG) in Abidjan, Côte d'Ivoire. The workshop was held in partnership with the Jacobs Foundation, the Institute for Human Development, at the Aga Khan University, and the Bernard van Leer Foundation.

The workshop was the ninth and final workshop of the Forum. Speakers explored research on the costs of quality investments in young children; policies and financing that capitalize on existing investments and other contextual advantages; and practices and research that are

culturally grounded and developmentally. This workshop also provided an opportunity to highlight the work of innovators from academia, non-governmental organizations, governments, and businesses conducting cutting edge work in these areas. While not traditionally considered “innovative”, long term approaches to investing in young children in West Africa will also be presented. Furthermore, given the unique circumstance of Francophone countries in Africa, the workshop highlighted some of the challenges and barriers to investments in young children in these countries as well as identified examples of research, policies, and practices that overcome these barriers to support young children.
