IPA Myanmar Presents at Myanmar Monitoring and Evaluation Association

IPA Myanmar presented its current studies at the Myanmar Monitoring and Evaluation Association. Research Associates T Nang Pan and Fabrizio Santoro presented our study on the impact of a maternal health app, and Senior Research Associate Nicholus Tint Zaw presented our study on cash transfers for pregnant women. The event was well-attended by both Myanmar and international staff working in research, and there was a lively Q&A after each session.

Address

Myanmar Monitoring and Evaluation Association

Country

Myanmar (Burma)
