The Dhaka Tribune on IPA Bangladesh Adolescent Health Findings

The Dhaka Tribune recaps a roundtable in which IPA Bangladesh Country Director, Dr. [Mohammad Ashraful Haque](#), presented baseline findings of a survey on adolescent well-being, assessing mental, physical, and sexual/reproductive health as well as educational and economic development. The survey also noted the role of violence in the everyday lives of Dhaka adolescents, finding: 68% of married adolescents experience intimate partner violence, 82% of adolescents report experiencing corporal punishment at school, and 62% of female caregivers use physical punishment to discipline underage family members.
