Abstract

The "Life with Corona" project aims to capture the voices and moods of affected citizens around the world, collecting data to provide answers to these questions. Life with Corona is a charitable open access citizen science project based on rigorous academic methods. The data will be made available for academic non-profit analyses.

Project Outcomes of Interest

What implications will this coronavirus pandemic have on the daily lives of people around the world? How will it affect the mental health, consumption and eating habits, social cohesion as well as expectations towards politics and public administration? And how will these factors develop over time as new information about the virus emerges and new measures are implemented by states?

Impact Goals

- Build resilience and protect the financial health of families and individuals
- Build resilient and adaptable businesses and employment opportunities
- Improve social-safety net responses
- Improve women's health, safety, and economic empowerment
- Promote peace and safety, and improve humanitarian response
