Gender and Adolescence: Global Evidence COVID-19

Researchers

Sarah Baird, Joan Hamory Hicks, Nicola Jones, Jennifer Muz

Abstract

With on-going mixed-methods longitudinal data collection of adolescents and their caregivers in Bangladesh, Ethiopia, and Jordan, the Gender and Adolescence: Global Evidence (GAGE) longitudinal research programme will undertake virtual survey research to understand young people's knowledge, beliefs, and behavioural responses in the context of the evolving COVID-19 pandemic in three diverse settings. It will also examine the short- and long-term impacts of COVID-19 on the six GAGE capability areas (education and learning; health, nutrition, and sexual and reproductive health; psychosocial well-being; economic empowerment; voice and agency; and bodily integrity).

Partners

Gender and Adolescence: Global Evidence (GAGE), George Washington University, Overseas Development Institute

Impact Goals

- Improve social-safety net responses
- Improve women's health, safety, and economic empowerment
- Keep children safe, healthy, and learning
Project Data Collection Mode

- CAPI (Computer-assisted personal interviewing)
- CATI (Computer-assisted telephone interviewing)
