COVID-19 Phone Survey in Senegal

Abstract

This survey aims to gather information on a representative sample of 1,000 respondents to understand how they are affected by the COVID-19 crisis, how well they follow mitigation measures, their perception of the crisis and government action and impact on children's education. The panel of respondents will be followed every month during the time of the crisis.

Questionnaire Description

The questionnaire aims to collect information on a representative sample of the Senegalese population for a rapid assessment at the beginning of the COVID-19 crisis. It includes sections on demographic, income, food security, COVID-19 mitigation measures, COVID-19 symptoms, migration, education, and support for government measures.

For guidance on using the questionnaire, [see the survey protocol](#) in English and French.
