On NPR, IPA Researchers Reflect on Deworming Impacts

NPR's Goats and Soda podcast covers the long-term impact of Nobel Prize winner, [Michael Kremer](#), and [Edward Miguel's](#) study evaluating [school-based deworming](#) in Kenya. Kremer, Miguel, and co-authors [Sarah Baird](#), [Joan Harmony](#), and [Michael Walker](#) have released [the 20-year results](#), which suggest, as [Chris Udry](#) says, "deworming is having these long-term effects on people's living standards." However, as [Seema Jayachandran](#) notes, deworming did not raise women's individual or household incomes.
