Using Phone Surveys to Assess the Economic and Food Security Impacts of Coronavirus (COVID-19) in Bangladesh (Questionnaire)

Abstract

This study aims to understand the impact of the pandemic and associated restrictions on economic activity on food and nutrition security in Bangladesh via phone surveys. It builds on

two recent surveys, the 2019 Bangladesh Integrated Household Survey (BIHS), a rural representative survey and the 2019 Urban Socioeconomic Assessment Survey (USAS).

Questionnaire Description

Household survey collecting information on economic effects of pandemic and on measures of food security

Respondent Population Characteristics

Adults, Urban only, Rural only

Project Data Collection Mode

- CATI (Computer-assisted telephone interviewing)

Researchers (*corresponding author)

John Hoddinott

Questionnaire File Type

Reader-friendly survey instrument

Questionnaire Language(s)

English

Questionnaire Stage

Baseline Completed

June 20, 2020
