End Date

April 29, 2021

RECOVR Webinar Series: Bringing Evidence to COVID-19 Policy Responses in the Global South

COVID-19's wide-ranging health and economic impacts have permeated across the world, and much of the research community has pivoted to respond. At IPA, we have launched a major effort—Research for Effective COVID-19 responses, or RECOVR, to support immediate response efforts and provide evidence to decision-makers working to mitigate the impacts of the crisis in the 22 countries where we work.

To rapidly share what we and our partners are learning, IPA is hosting the **RECOVR Webinar Series: Bringing Evidence to COVID-19 Policy Responses in the Global South**. In this series, we are sharing new research findings and policy perspectives from IPA and our partner organizations on the COVID-19 crisis in order to support evidence-informed response efforts. All webinars are open to the public and all are encouraged to attend; recordings will also be made available approximately 1-3 business days after each event. For recordings of past webinars and information about registration for future ones, please visit the individual webinar pages below.

- [June 11 - Early Evidence on COVID-19, Mobility, and Migration](#)
- [July 2 - Informing Policy on COVID-19 with Rapid Data: Results and Responses from the RECOVR Survey in Ghana](#)
