Life with Corona- Africa Project Questionnaire

Abstract

The overall objective of LwC-Africa is to generate new evidence and policy guidelines on how African citizens respond to and cope with the profound global shock to their lives and livelihoods caused by Covid-19. The survey builds on the unique Life with Corona online survey to advance understanding of how the pandemic is affecting health, food, work, gender and social cohesion outcomes in order to better prepare communities and governments to respond to the challenges ahead as the pandemic spreads across the continent.
