The Dhaka Tribune on Study Increasing Mask-Wearing in Bangladesh

The *Dhaka Tribune* reports on IPA's study of more than 340,000 people across 600 villages in Bangladesh that demonstrated the effectiveness of masks—particularly surgical masks—in preventing the spread of COVID-19. The findings of this evaluation, the largest of its kind, may help inform the COVID response across Asia, Africa, and Latin America.

The study was also featured in *Nature* (twice), *Salon*, *Yale Daily News*, *Yale Insights*, *Stanford Medicine*, *Gizmodo*, *New York Daily News*, *Live Science*, *Washington Examiner*, *Daily Mail*, *India Today*, *BD News 24* (Bangladesh), *Daily Star* (Bangladesh), and more.
