Philippines Socioeconomic Panel Survey:
Providing publicly available data to investigate the long-run processes of social and economic development

The Challenge
A major constraint to the understanding of development is in the absence of timely, representative, rich and high-quality data. Most data-collection efforts are carried out at a single point in time, and focus only on variables of interest, relevant to particular policy questions or impact evaluations. Panel studies suffer from risks, constraints, and representativeness for the population tracking individuals over an extensive period of time with a wide array of questions to capture both the natural and man-made environment in which they live. However, on a strong survey infrastructure, and experienced personnel ensuring high-quality standards of the data collected.

Socioeconomic Panel
Innovations for Poverty Action (IPA) and the Global Poverty Research Lab (GPR) at Northwestern University have partnered with the Philippines Institute for Development Studies and the University of the Philippines School of Economics to launch a twenty-year panel survey, tracking a sample of rural households in Western Visayas.

The objective is to provide publicly available data for government actors, researchers, and practitioners to better understand the long-run processes of social and economic development. In addition, the panel will serve as an inclusive platform for enabling rigorous impact evaluations that test specific programs and policies designed to alleviate poverty.

PSPS at a Glance

Location: Rural Western Visayas (Aklan, Antique, Capiz, Iloilo, Negros, and Ibarra)

Scope:
- 1,000 rural households across 11,000 barangays

2013:
- First wave of data collection in August
- Regular data collection every four years

2013:
- Various interventions take place over twenty-year time frame

PSPS Brochure
Philippines Socioeconomic Panel Survey (PSPS) Launching

Thursday, May 18, 2023, | UPSE Diliman Campus Auditorium | 2:30 PM - 6:00 PM

Innovations for Poverty Action (IPA) and the University of the Philippines School of Economics (UPSE) are delighted to invite you to the launch event of the Philippines Socioeconomic Panel Survey on the 18th of May 2023. The event will bring together national policymakers, local NGOs, international funders and the private sector to speak about leveraging panel data for evidence-based programming.

The Philippines Socioeconomic Panel Survey (PSPS)

This year, IPA and the Global Poverty Research Lab (GPRL) at Northwestern University, are launching the Philippines Socioeconomic Panel Survey (PSPS) in partnership with the Philippine Institute for Development Studies and the UPSE. The PSPS is a 20-year panel survey.
that will shed light on the long-run processes of socioeconomic development by providing publicly available data for government actors and the Philippine public.

**Beyond the Snapshot**

Join us in welcoming Dean Karlan and Chris Udry, lead academic researchers for the PSPS, to share insights on their motivation behind starting this twenty-year evidence-generation initiative and how it could be used for the wider public. Engage with actors through a high-level forum of central and local government, the private sector, and NGOs to explore the use of long-run data and rigorous impact evaluation in their respective fields.
