

What Have We Learned About Enabling Learning?

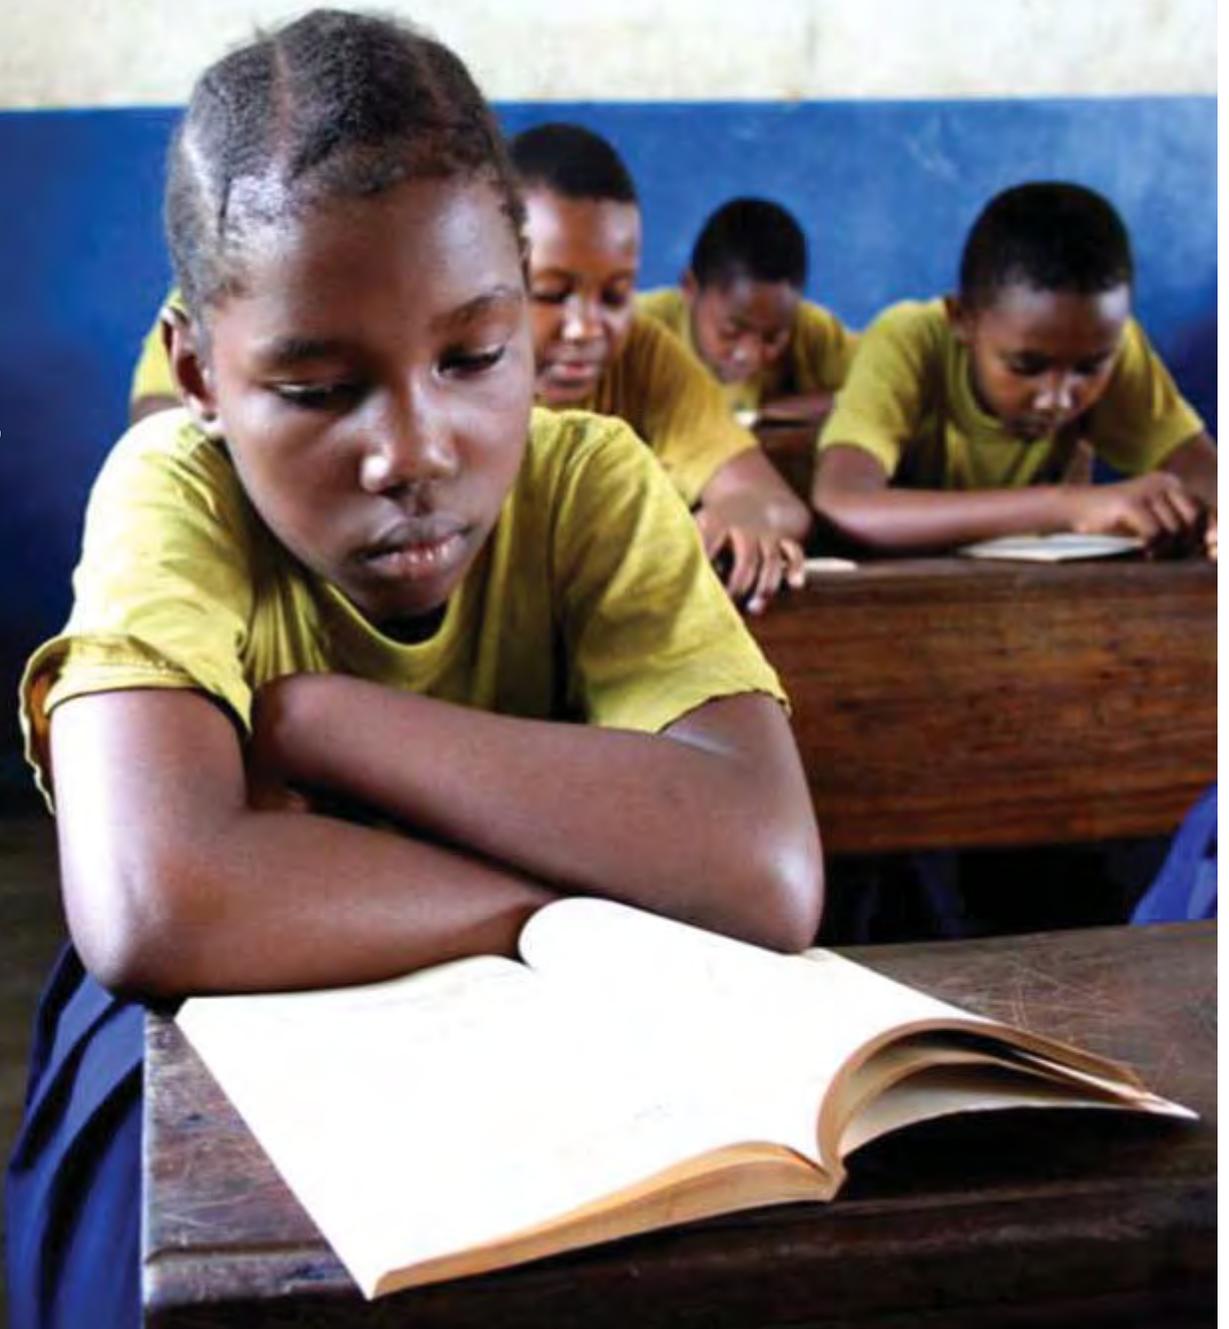

Two Assessments and Two Experiments in East Africa

Rakesh Rajani / twaweza.org / [@rakeshrajani](https://twitter.com/rakeshrajani)

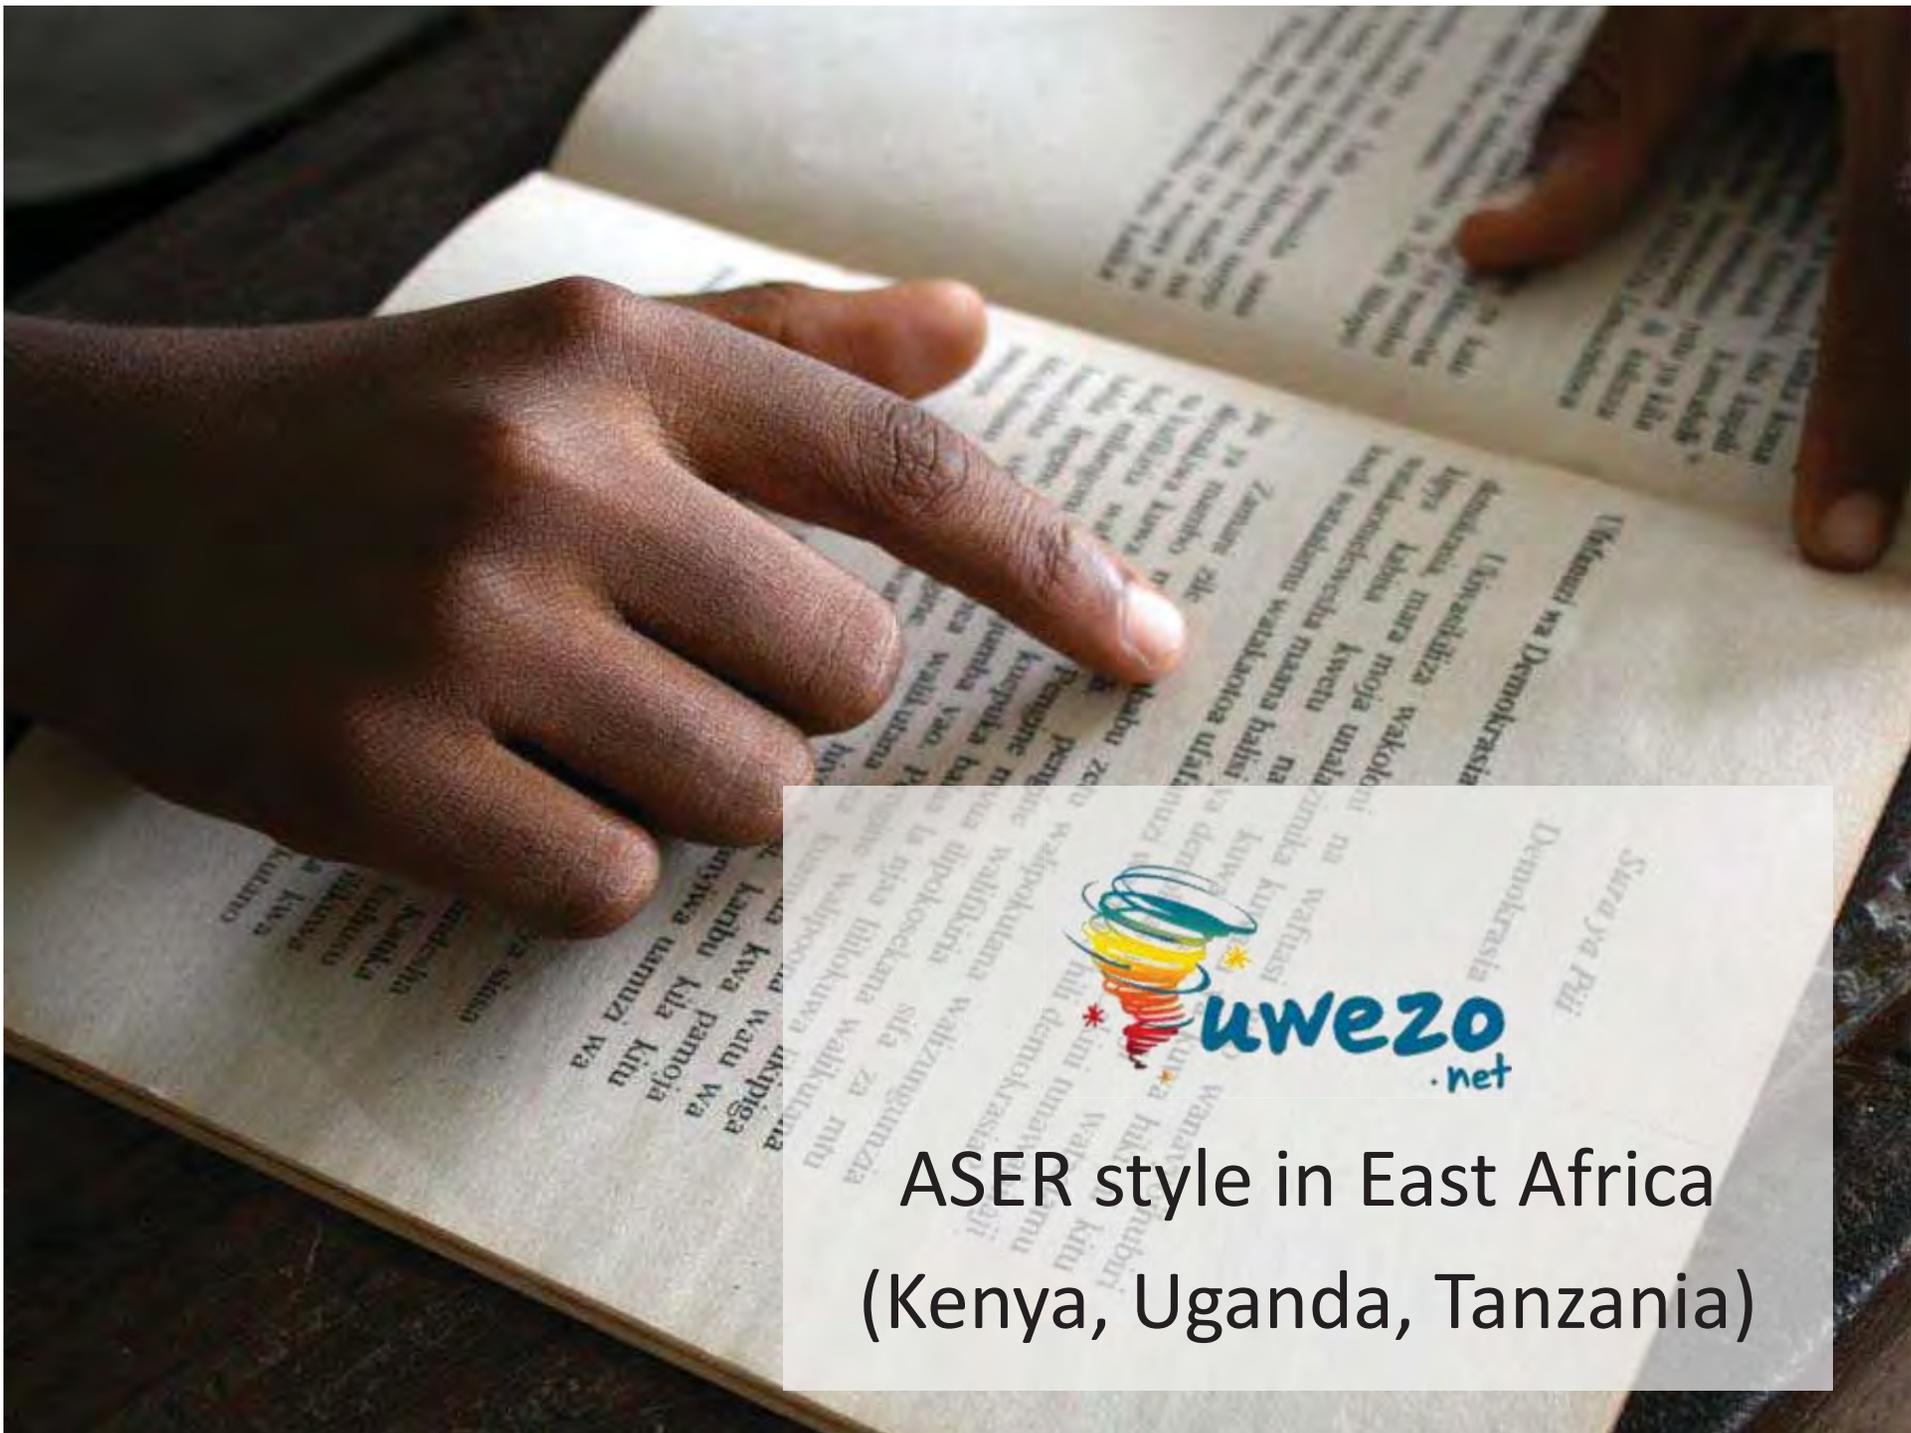

Large expansion of
primary school
enrollment in Kenya,
Tanzania and
Uganda

Increased budgets
Teachers trained,
hired
Classrooms built

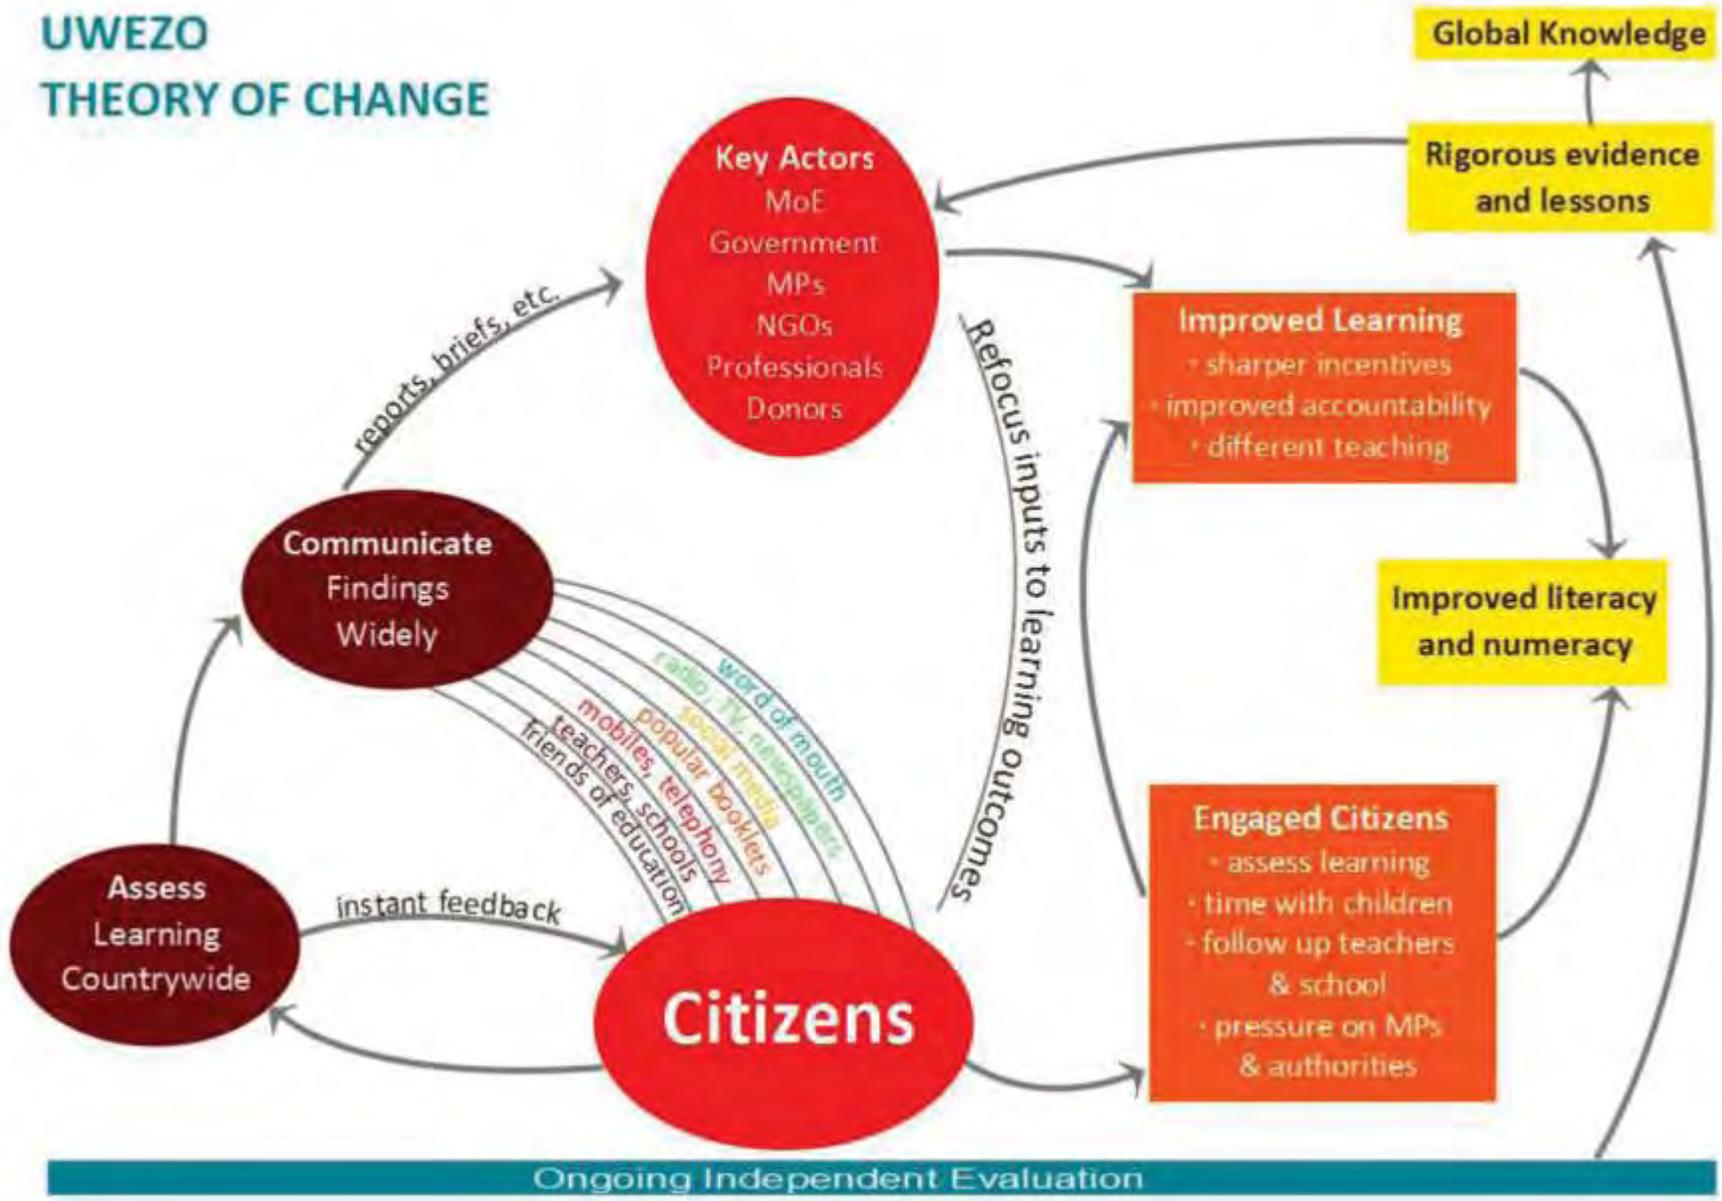

But are children learning?

ASER style in East Africa
(Kenya, Uganda, Tanzania)

**UWEZO
THEORY OF CHANGE**

Key Features of Uwezo

Scale

Yearly assessment, in all districts
In each district x 30 EAs x 20 hhs
2011: 320 districts, 348,384 children

Robust Design

- All children aged 6-16 years
- Assessment tools simple; national standard
- Fast: 100 days data collection to final report

Action Oriented

- Volunteer-based
- “Floor Level” assessments to spark conversation, debate, action. Change.

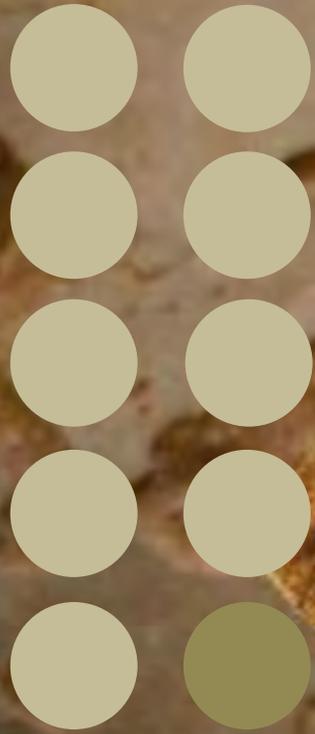

Methodology

National Bureau of Statistics gives Enumeration Areas (EA) list in every district. Select random EAs.

District Coordinator, local volunteers and village chairperson make household list. Select random households.

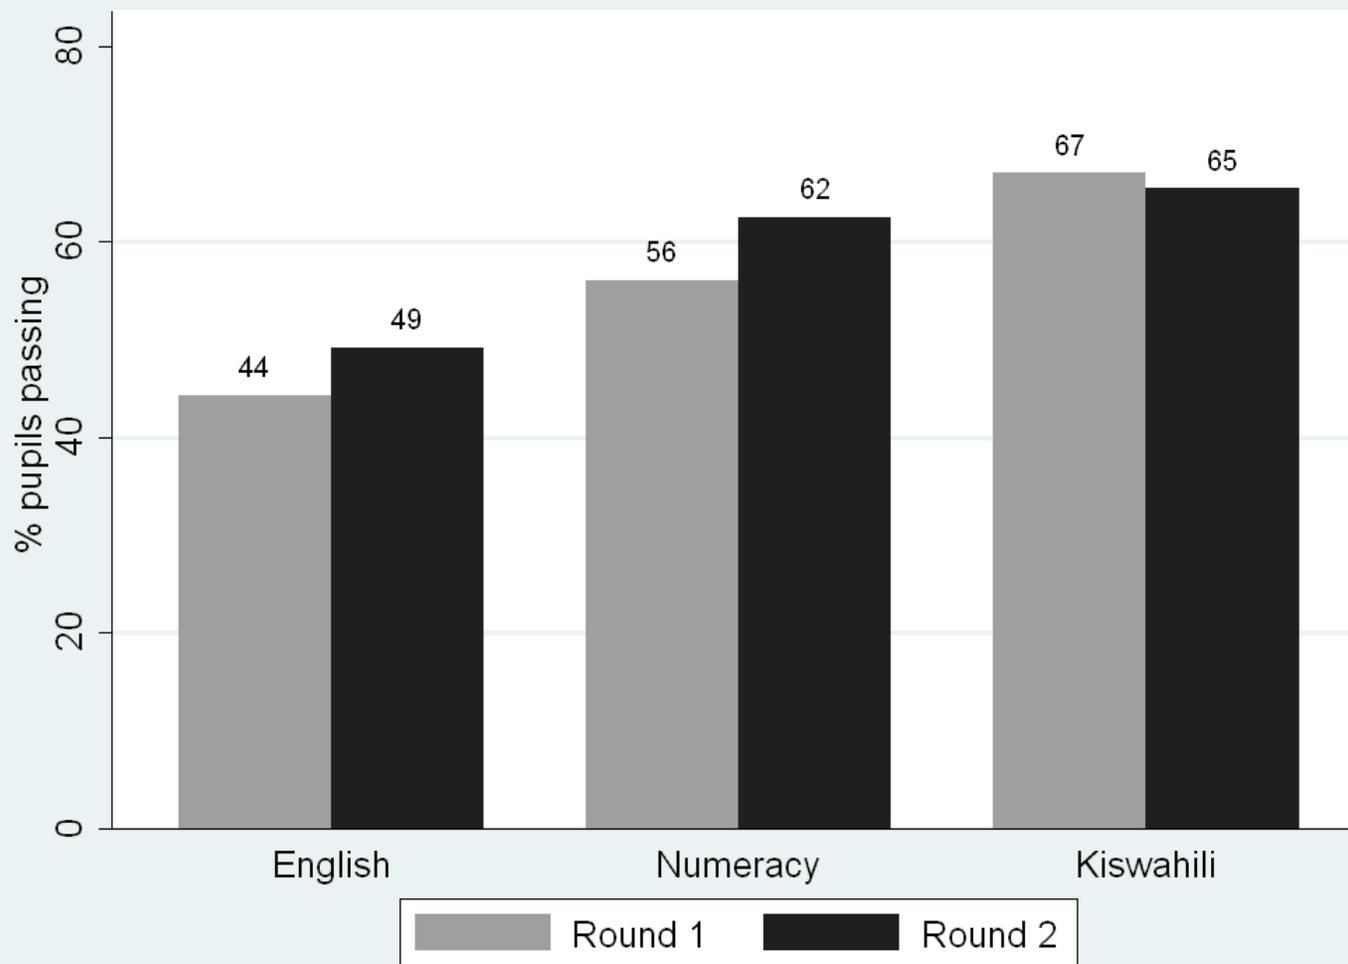

Results weighed by district size to represent the country.

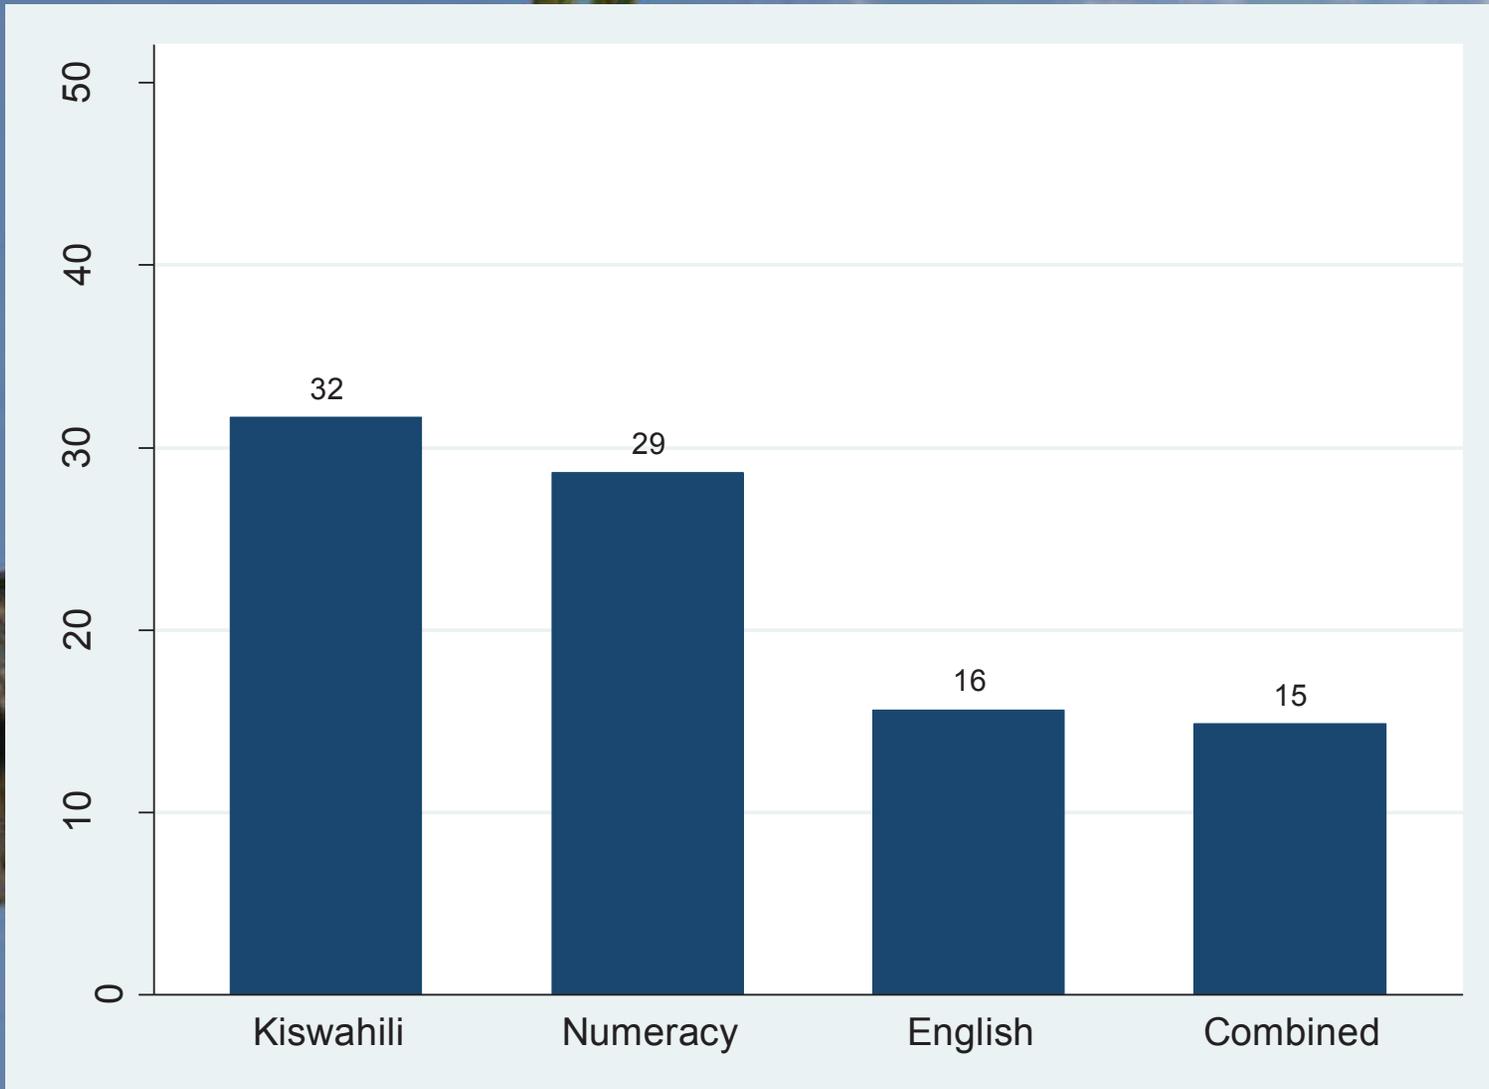

8/10 Grade 3
pupils did not
pass Grade 2
assessment

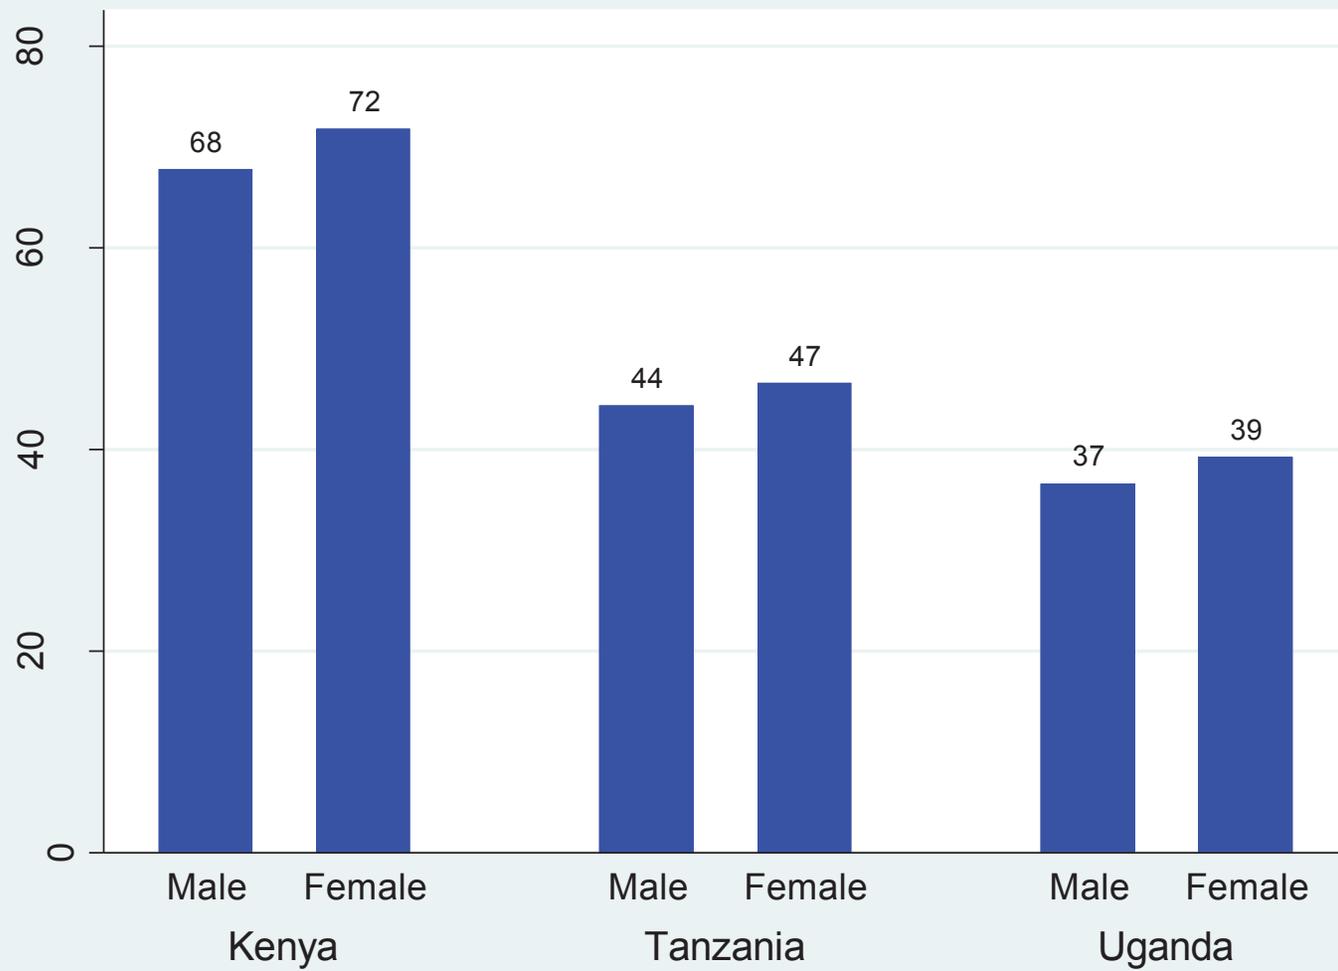

Uwezo literacy and numeracy test results

Pass Rates for Standard 3 Students

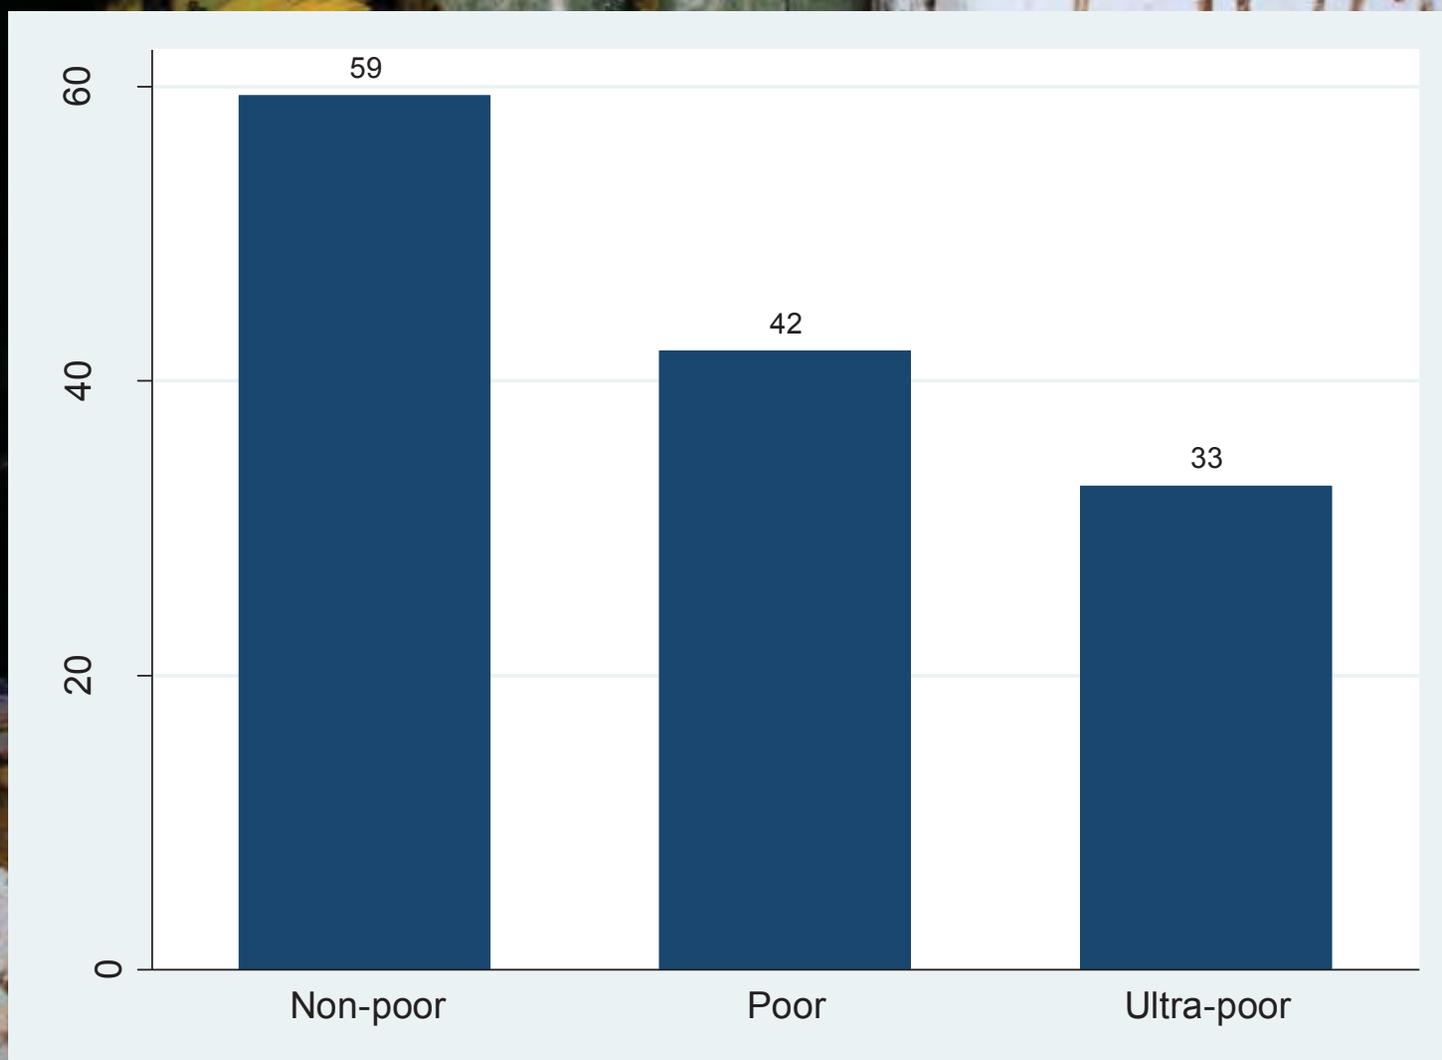

Pass rates by country and sex

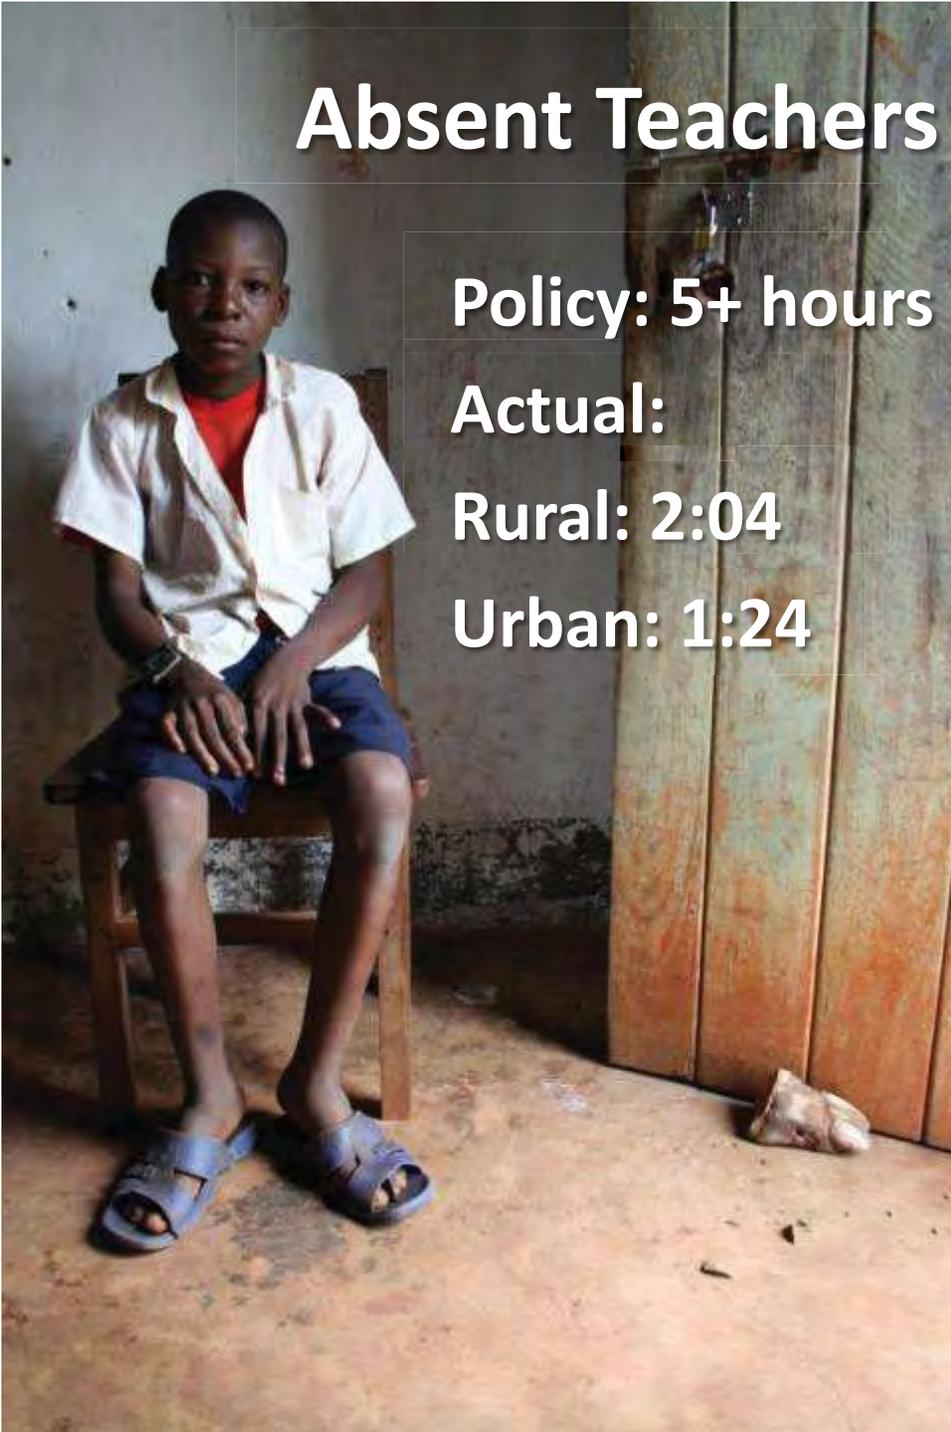

Only 3/10 ultra-poor students passed the Uwezo assessment

Pass rates by categories of socio-economic status

Absent Teachers

Policy: 5+ hours

Actual:

Rural: 2:04

Urban: 1:24

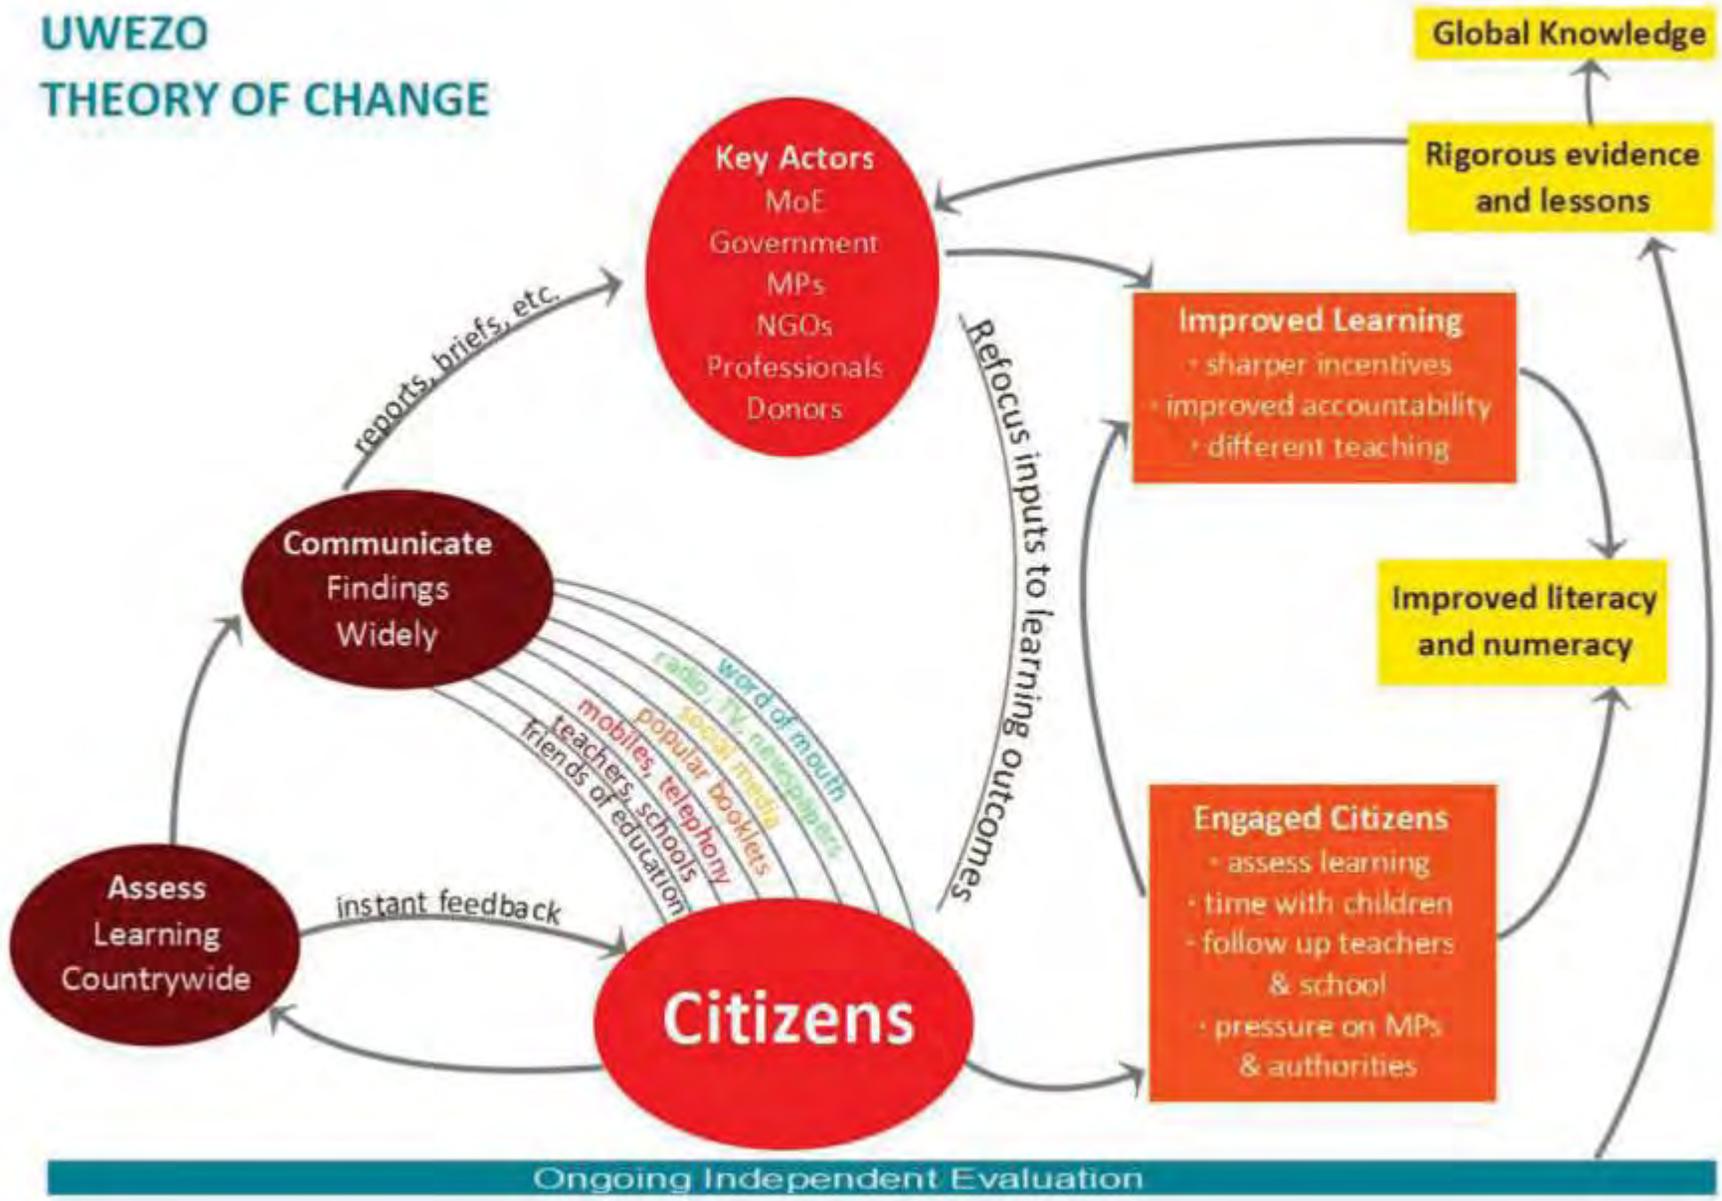

Money for schools

Policy: \$10

Actual: < \$2

**UWEZO
THEORY OF CHANGE**

Two Ideas - Two experiments
(RCTs + qualitative)

1. Capitation Grant
2. Local Cash on Delivery

A photograph showing two men from behind, looking at a display of newspapers. The man on the left is wearing a blue and white striped polo shirt, and the man on the right is wearing a grey camouflage t-shirt. The newspapers are hanging on a wall and feature various headlines in Swahili, including 'NIPASHE', 'KIMBEMBE YANG', 'Kiiza a ndoa y', 'majira', 'Sheria ya kudhibiti maandamano yaja', 'Makatuu wapy CCM watajwa', and 'Viongozi wa di wamuo Tama'.

Testing full implementation of current policy / *input incentive* (capitation grant); comparing it with new innovation of *outcome incentive* (local COD)

Capitation Grant

- Paying up front for inputs
- Pay in full 2x/yr
- \$10/enrolled pupil
- Treatment arms:
 - Low /high info
 - Districts/direct to schools

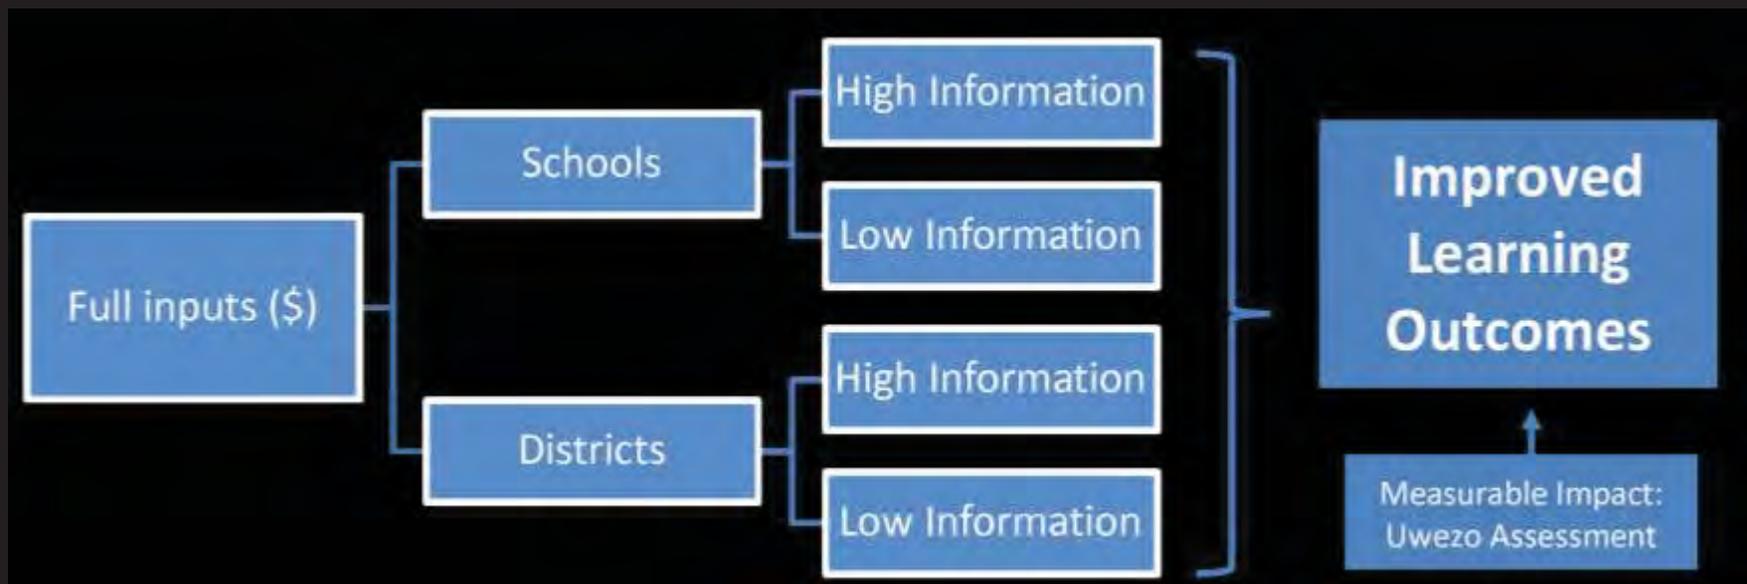

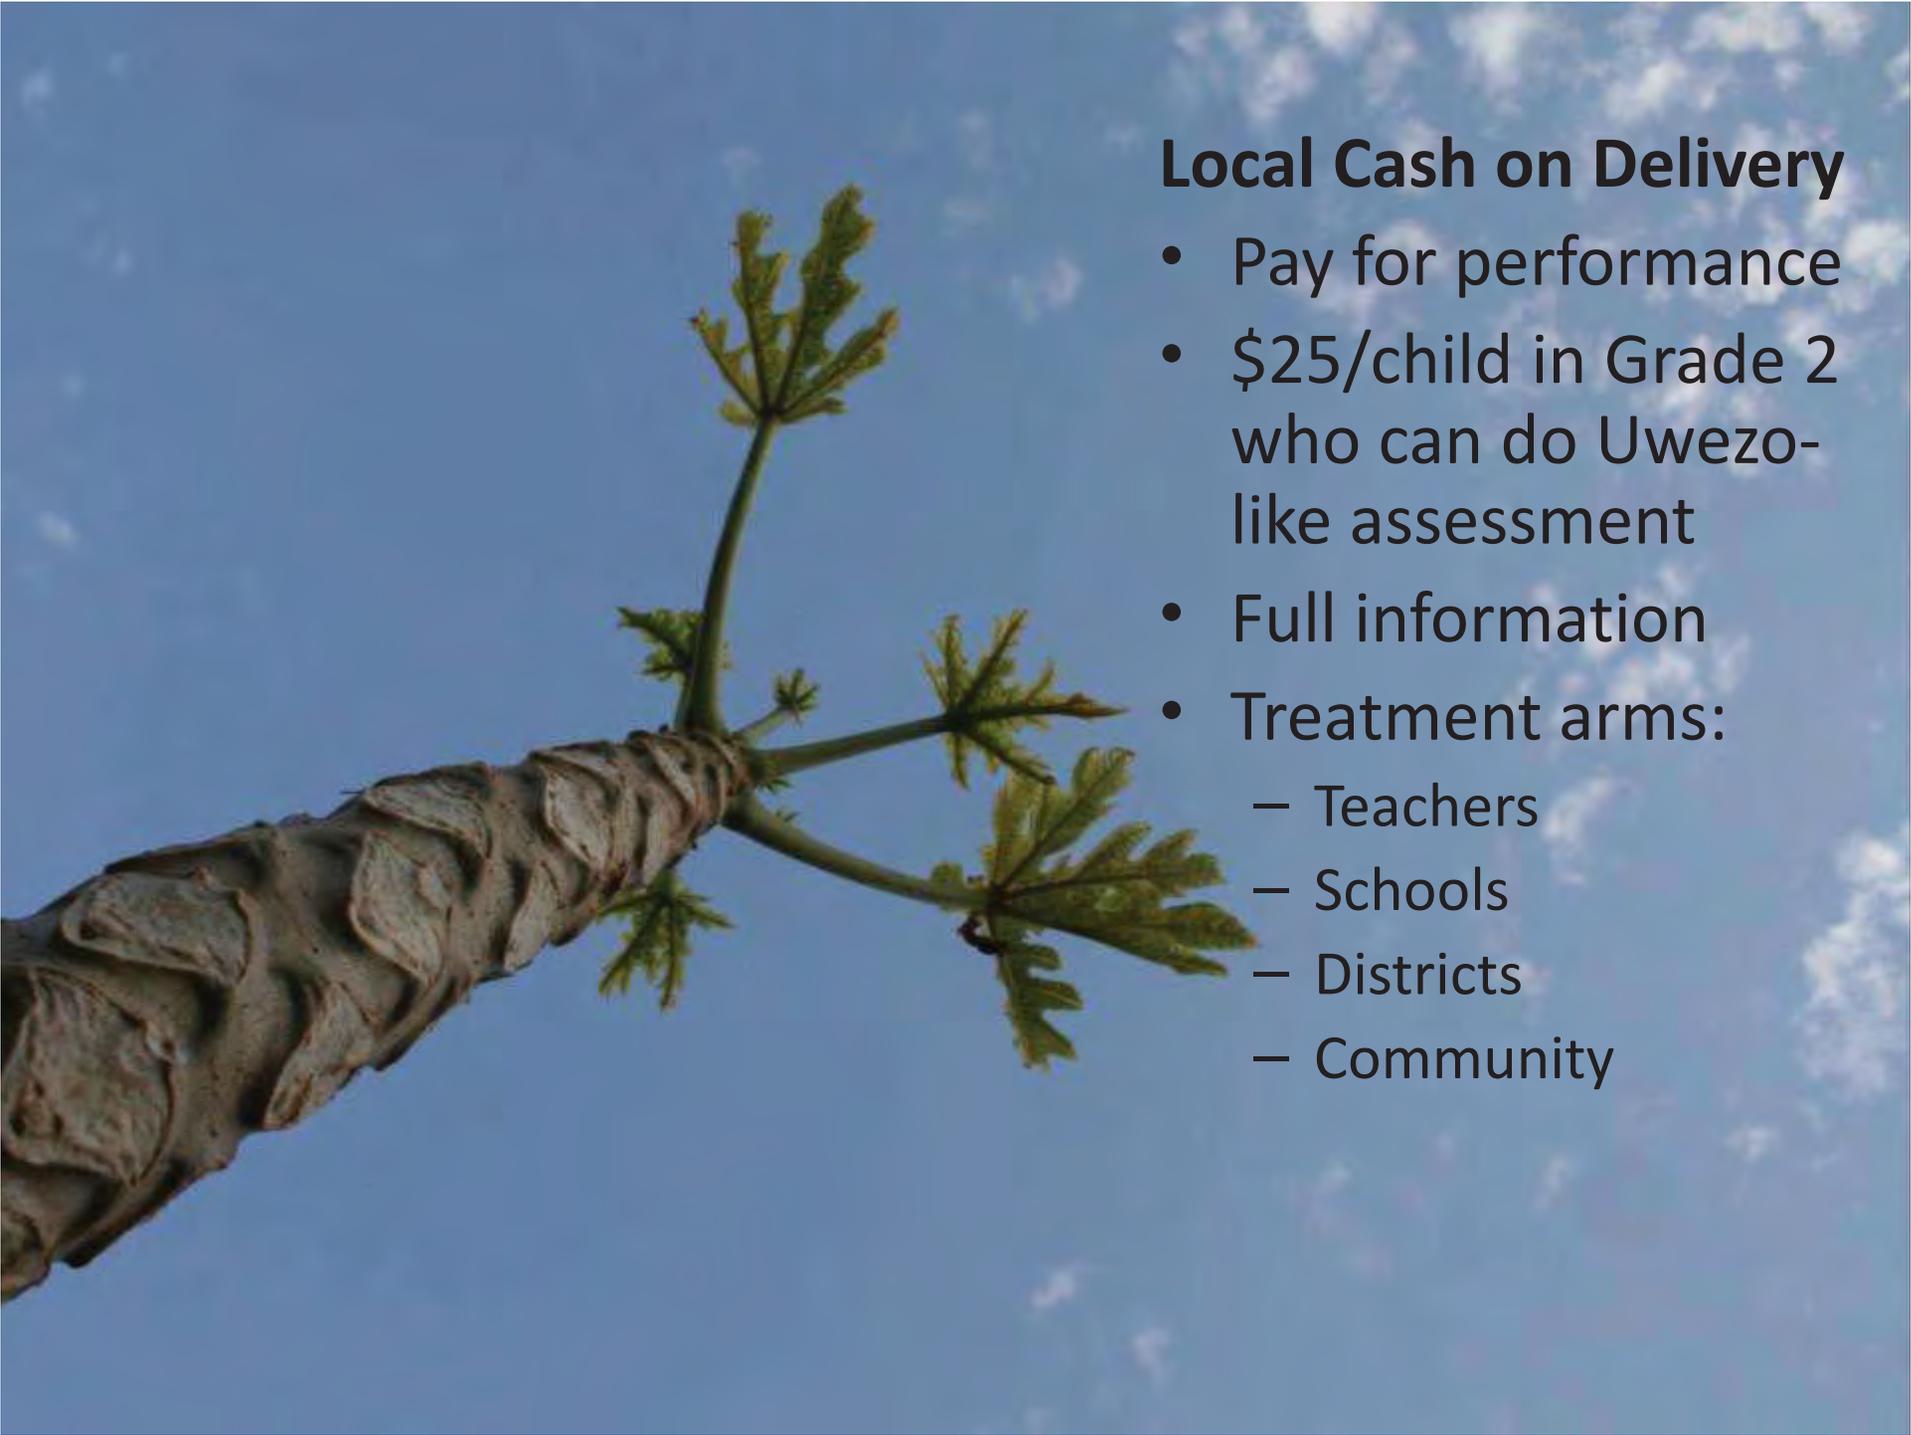

Capitation Grant

Demonstrate you can get money to school

Test whether information makes a difference

Test impact on literacy and numeracy (and Std 7)

Local Cash on Delivery

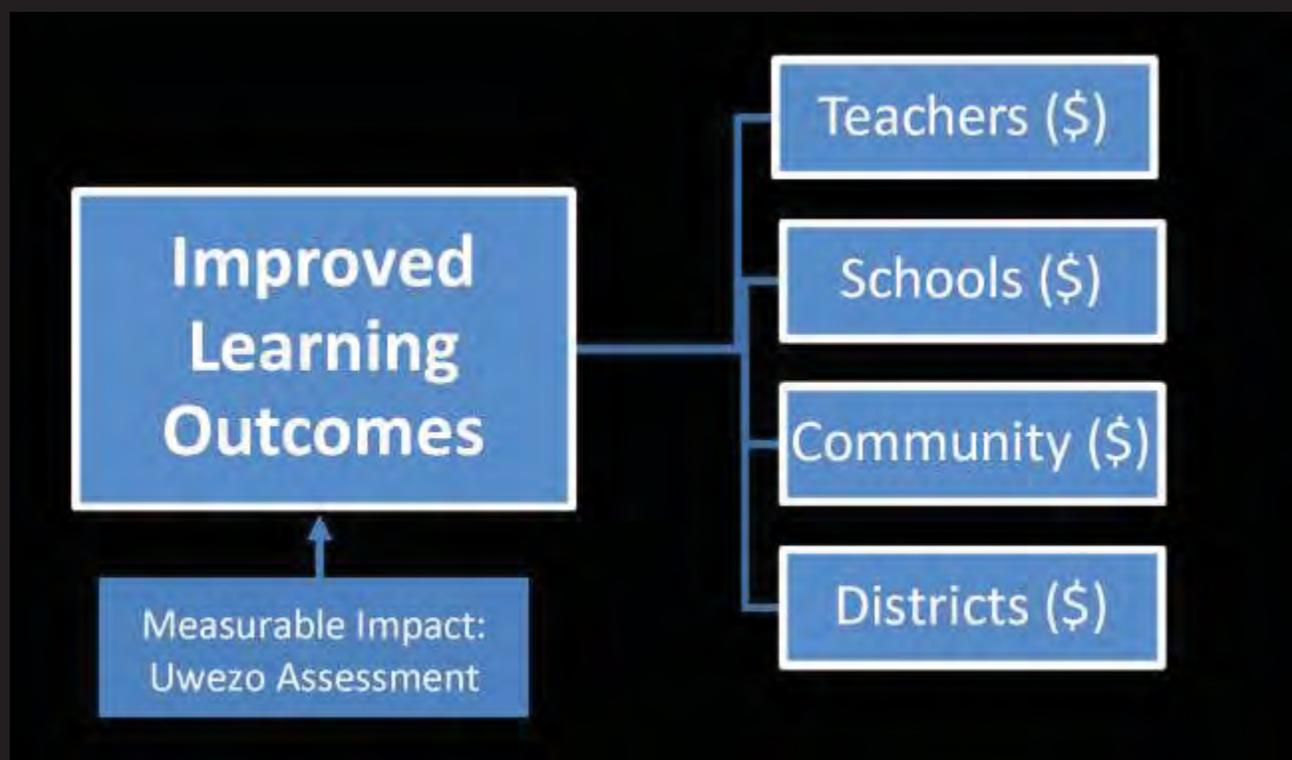

- Pay for performance
- \$25/child in Grade 2 who can do Uwezo-like assessment
- Full information
- Treatment arms:
 - Teachers
 - Schools
 - Districts
 - Community

Local Cash on Delivery

Test whether incentive spurs people to figure out learning
(though tell stories of how others have made it happen)

Test which arm (targeting) brings biggest impact

Follow how communication affects local dynamics

Issues to sort out

- Pay for absolute level or change?
- Minimum % of all to pass before incentive kicks in?
- Getting champion MPs involved (ruling party, opposition)
- Critical mass of districts needed to drive policy change

Thinking scale first:

Both do-able at national level; both affordable (eg in Tanzania national edu budget is > \$1.2 billion)

- Cap grant 9 million pupils x \$10 = \$90m (+6m)
- Local COD grade 2 max 1m 'pass' x \$25 = \$25m (+9m)

Partners

- TTU Tanzania Teachers Union
- Government of Tanzania
 - President's Office
 - Ministry of Education
 - Prime Minister's Office ,
local govt
- Independent evaluation
entity (JPAL/IPA)
- CGD
- Donors (Twaweza's, WB,
DFID, Sida in Tanzania)
- Uwezo assessment tools

Timeline

- 2012 Firm up design, with evaluator (JPAL, IPA, CEGA)
Agreements with partners
Implementation coordinator, logistics
- 2013/4 Implementation and data collection
Uganda or Kenya roll out?
- 2014 Review, kill or tweak, policy advocacy
